Dee's University

Do terms like *megapixels*, *white balance*, *compression*, and *read/ write speeds* confuse you?

Then let the pros at **Dee's University** demystify digital terminology for you, as well as help with overall photographic techniques to let you achieve the results you want.

We invite you to get the most from your digital photographic experience, and attend a course, which includes four sessions of 1 ½ - 2 hours of instruction, and one Sunday afternoon field trip, to help with the execution of the techniques learned.

The instructor, Mr. Scott Cox, is a professional photographer, who has been teaching people how to light and compose better photos for years.

Bring your camera....class is hands on!!
